

QUIRASS

**Turning everyday transactions
into financial trust**

QuadAI
April 5, 2026

Millions are financially invisible

Trust exists — but it is not captured.

- Students and informal workers cannot access credit
- No bank history = No trust
- Yet, they use mobile money daily

The Credit Access Gap

1. Traditional systems require:

- Collateral
- Formal income
- Credit history

2. Reality:

- Most users operate outside formal banking
- No structured financial records

3. Impact:

- No loans
- No growth opportunities
- Financial exclusion

The Impact of Financial Exclusion

Credit
Access

Financial Exclusion

Millions remain locked out of the formal financial system, perpetuating cycles of poverty and preventing participation in the modern economy.

No Access to Loans

Without credit history or collateral, individuals are denied loans from traditional banks, leaving them unable to access capital when they need it most.

No Growth Opportunities

Small businesses and entrepreneurs cannot invest in expansion, inventory, or equipment, stunting economic potential and limiting upward mobility.

Our Solution

- An AI-powered system that builds credit scores using alternative financial data like transaction history, behavior, and verified evidence.

System Flow

Five steps from evidence upload to final loan decision

TRUST & FRAUD WAT

Our Impact

- Enables financial inclusion
- Builds trust without banks
- Reduces fraud using AI
- Works in low-data environments

Who We Serve

- Students
- Freelancers
- Informal workers
- Small business owners

MARKET OPPORTUNITY

- **TAM:** All unbanked individuals
- **SAM:** Mobile money users
- **SOM:** Students & urban users

What Makes Us Different

- AI + Human decision system
- Works without bank integration
- Handles real-world messy data
- Fraud-aware (confidence scoring + validation)
- Scalable for emerging markets

Our Team

**Built collaboratively with strong technical
and problem-solving focus**
